PROFILE

DevOps-oriented Software Engineer with 5+ years of experience in cloud infrastructure, CI/CD, and scalable web systems. Skilled in Azure, AWS, Kubernetes, Docker, Prometheus, with strong backend expertise in PHP (Laravel, Lumen), Golang, and microservices. Known for end-to-end ownership, automation, and ensuring high system reliability.

EXPERIENCE

DEVOPS ENGINEER

GINCO IT

01/2026 – Present
DUBAI, UAE

- Architect and operate scalable, resilient platforms across multi-cloud and on-premises environments.
- Implemented GitOps principles to ensure Git remains the single source of truth, making deployments predictable and reversible.
- Modernized infrastructure management by treating all resources as version-controlled code (IaC) to ensure auditability and consistency.
- Built robust CI/CD pipelines using Azure DevOps and GitHub, streamlining the path from code to production.
- Manage production-grade Kubernetes clusters, focusing on security, deep observability, and Helm-based standardization.
- Partner with development teams to remove delivery friction, improving overall system reliability and deployment frequency.

SOFTWARE ENGINEER

SKYLOOV

10/2023 – 01/2026
DUBAI, UAE

- Managed cloud infrastructure and deployments: Migrated dev/test environments from AWS (EKS, ECR, Kubernetes) to on-prem Minikube, reducing infrastructure costs by \$3K/month.
- Built CI/CD pipelines with GitHub Actions + Docker, automating deployments and cutting release cycles by 40%.
- Implemented Prometheus monitoring and alerting to ensure continuous visibility into microservice health.
- Developed and maintained microservices for marketing, analytics, chat, and agent tracking using Laravel, MongoDB, Reverb, and XML services.
- Configured Omada firewall rules, strengthening network security and throughput.
- Used Laravel Pulse APM to monitor performance across all Laravel microservices.

SOFTWARE ENGINEER

BLUE HOLDING

12/2022 – 10/2023
ALEXANDRIA, EGYPT

- Led cloud migration from cPanel to AWS (EC2, S3, SES, CloudFront), improving uptime, scalability, and system reliability.
- Designed and implemented Dockerized CI/CD pipelines with GitHub Actions, streamlining deployments across multiple services.
- Owned application deployments, uptime monitoring, and infrastructure health, ensuring stable production environments.
- Optimized Redis-powered intranet notifications to boost internal communication.
- Built backend systems for AGS (American Gulf School), automating attendance and grading, saving staff 15+ hours weekly.

BACK-END DEVELOPER

POSLIX

12/2021 – 12/2022
REMOTE, MUSCAT,
OMAN

- Deployed ERP system on AWS Elastic Beanstalk, simplifying scaling, monitoring, and maintenance.
- Refactored legacy ERP APIs and optimized PostgreSQL queries, improving performance by 35%.

- Recovered and migrated a damaged POS database, ensuring business continuity and data integrity.

FREELANCER

- Delivered deployment-ready web applications, managing hosting, CI/CD, and infrastructure for clients.
- Built Media-Share, a freelancer portfolio platform with integrated payments, serving 200+ users.
- Developed Y-GYM, a gym management system with real-time attendance tracking and automated backend workflows.

01/2020 – 12/2021
REMOTE, FIVERR &
UPWORK

EDUCATION

B.S. IN COMPUTERS AND INFORMATICS

Kafr Elsheikh University [🔗](#)

01/2017 – 07/2021
Egypt

SKILLS & ABILITIES

Cloud Platforms

Microsoft Azure (AZ-204, AZ-900), Amazon Web Services (AWS), Multi-Cloud Architecture.

Infrastructure

Terraform (IaC), Kubernetes, Helm, Docker, GitOps, CloudFormation, Azure Bicep.

CI/CD & DevOps

Azure Pipelines, AWS CodePipeline, GitHub Actions, GitLab CI, CircleCI, Release Engineering.

Observability

Azure Monitor, AWS CloudWatch, Prometheus, Grafana, Alerting & Monitoring Workflows.

Backend & APIs

Golang, PHP (Laravel/Lumen), REST APIs, Microservices, Azure Service Bus, AWS SQS/SNS.

Data & Storage

Azure SQL, AWS RDS, PostgreSQL, MySQL, MongoDB, Elasticsearch, Meilisearch.

Caching & Streams

Azure Cache for Redis, AWS ElastiCache, Kafka, Redis Pub/Sub, WebSockets, Pusher.

Frontend & Web

Vue.js, Nuxt.js, Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Design.

Core Strengths

System Design, Troubleshooting, Technical Communication, Git, GitHub/GitLab.

LANGUAGES

Arabic

Native

English

Fluent
